

WORCS Round 5 at Ridgecrest

The past round of WORCS was in Ridgecrest, Ca. I have won every single round of WORCS in both of my quad classes all year and I felt very confident. Although I was confident, I was still a little nervous coming into the first race because I was racing my new race bike, thanks to Triumph Motorsports. I had all new gear from Atlas, Kali, and FLY racing which felt a little foreign because I wasn't used to the new designs. Off the start I had excellent traction thanks to my STI Tires, and DWT wheels. I got the hole shot thanks to my Triumph / NGR built motor and started to pull a slight lead. After about half a lap I caught up to slower riders. Once I knew I was going to be up front, I pulled a tear off, so my X Brand goggles gave me clear vision again. I had a clear track until the end of the race when I won. I haven't had a lot of time to test out my new Elka shocks, but out of the box they worked amazing with my LSR components.

The next morning I had another ATV race at 8:30 in the morning. I was pretty tired and sore from my back to back races the previous day. I got the holeshot once again and pulled a lead a strong lead. I also had more control thanks to a stiffer adjustment on my Precision Steering stabilizer, and my Fasst Flex bars. I pushed the whole entire race, until the end, when I pulled off with happiness that I had won again.

Thanks to everyone who helped get the new race bikes done! It was amazing!
